Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

1) Responsive to communication(s) filed on 11 July 2005.
 2a) This action is **FINAL**. 2b) This action is non-final.
 3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Response to Amendment

This Office is in response to Applicants' RCE filed on July 11, 2005. Claims 1-20 have been cancelled. Newly added claims 21-27 are presented for examination.

Specification

1. The disclosure is objected to because of the following informalities: Applicants' fails to define the characteristic of a first and second portion of the data and how copying a first and second portion of the data through the data pipe in a first and second chunk in a first and second format base on the first and second characteristic is performed.

Appropriate correction is required.

Drawings

2. The drawings are objected to under 37 CFR 1.83(a) because they fail to show how copying a first and second portion of the data through the data pipe in a first and second chunk in a first and second format base on the first and second characteristic as described in the specification. Any structural detail that is essential for a proper understanding of the disclosed invention should be shown in the drawing. MPEP § 608.02(d). Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as

“amended.” If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either “Replacement Sheet” or “New Sheet” pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claims 21-27 are rejected under 35 U.S.C. 102(e) as being anticipated by Chapp et al (hereinafter, "Chapp", 6,654,825)

As per claim 21, Chapp discloses a method for copying data from a source to a destination using a data pipe, the method comprising:

- identifying at least a first characteristic of a first portion of the data (col. 15, lines 63-67

and col. 16, lines 1-6);

- identifying at least a second characteristic of a second portion of the data (col. 15, lines 63-67 and col. 16, lines 1-6);
- copying a first portion of the data through the data pipe in a first chunk in a first format based on the first characteristic (col. 9, lines 65-67, col. 10, lines 1-4 and col. 14, lines 24-46); and
- copying a second portion of the data through the data pipe in a second chunk in a second format based on the second characteristic, the second format being distinct from the first format (col. 9, lines 65-67, col. 10, lines 1-4 and col. 14, lines 24-46).

As per claim 22, Chapp further discloses:

- generating a first header describing the contents of the first chunk (col. 14, lines 24-55); and
- generating a second header describing the contents of the second chunk (col. 14, lines 24-55).

As per claim 23, Chapp further discloses:

- sending the first chunk with the first header to the destination (col. 14, lines 24-55); and
- sending the second chunk with the second header to the destination (col. 14, lines 24-55).

As per claim 24, Chapp discloses wherein:

- the first header indicates where to store the first chunk (col. 13, lines 29-38 and col. 15, lines 1-9); and
- the second header indicates where to store the second chunk (col. 13, lines 29-38 and col. 15, lines 1-9).

As per claim 25, Chapp further discloses:

- storing the first chunk in a first storage medium in the first format (col. 13, lines 29-38 and col. 15, lines 1-9); and
- storing the second chunk in a second storage medium in the second format, the second storage medium being distinct from the first storage medium (col. 13, lines 29-38 and col. 15, lines 1-9).

As per claim 26, Chapp discloses wherein:

- the first header includes information on at least one process to be performed on the first chunk (col. 14, lines 24-55); and
- the second header includes information on at least one process to be performed on the second chunk (col. 14, lines 24-55).

As per claim 27, Chapp further discloses:

- performing the first processes on the first chunk (col. 14, lines 24-55); and
- performing the second processes on the second chunk (col. 14, lines 24-55).

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
